

USER INFORMATION

CONTROLLING and REGULATION SYSTEMS

Controlling and regulation systems

Fan control with for laboratory und small plants
(control of fan shutoff-flaps, air flow monitoring, quartz-controlled timer)

Control and regulation devices for central ventilation in housing construction
(time and temperature control, pressure control)

Speed controller, Frequency inverter

Pressure- and air flow monitoring of fans and plants

Sensors for temperature, pressure and humidity

Motor protection device for PTC thermistors

Repair switch and motor protection switch
(different features as auxiliary contact, key-locked, 3-poles, 6-poles, explosion proof)

Connection diagrams for fans
